Visual Display and Presentation Products

Vivitek, a brand of Delta, is a leading manufacturer of visual display and presentation products. The company's extensive lineup of award-winning digital projectors, collaboration solutions and digital signage devices incorporate the latest innovations and technologies to deliver superior products.

Vivitek has global sales and marketing operations in Europe, the Middle East, Africa, Asia and the Americas, and is renowned for providing the industry's best warranties and innovative solutions.

Delta, founded in 1971, is a global provider of power and thermal management solutions and a major player in several product segments such as industrial automation, displays, and networking. Its mission statement, "To provide innovative, clean and energy-efficient solutions

for a better tomorrow," focuses on addressing key environmental issues such as global climate change. As an energy-saving solutions provider with core competencies in power electronics and innovative research and development, Delta's business domains include Power Electronics, Automation, and Infrastructure.

Delta has 169 sales offices, 69 R&D centres and 37 manufacturing facilities worldwide.

Throughout its history, Delta has received many global awards and recognition for its business achievements, innovative technologies and dedication to corporate social responsibility.

Since 2011, Delta has been listed on the DJSI World Index of Dow Jones Sustainability™ Indices for eight consecutive years. In 2017, Delta was selected by CDP (formerly the Carbon Disclosure Project) for its Climate Change Leadership Level for the second consecutive year.

Projection and Display Solutions for Every Application and Budget

Projectors

Years of successful product and technology innovations, have resulted in innovative, high quality products for a variety of user needs, ranging from large venue, business, education and home entertaining.

NovoConnect Collaboration Solution

NovoConnect collaboration solutions allow interactive, collaborative, and productive meetings. NovoConnect transforms conference rooms into a true collaborative spaces.

Through out the years, Vivitek has come to understand the unique challenges of every market and applies that knowledge into products designed to excel in a wide variety of environments.

Digital Signage

NovoDS digital signage is a very affordable and easy to manage solution which is ideal for creating dynamic visual displays for a corporate or public space.

Video Wall Solutions

Vivitek's parent company Delta, offers a wide selection of off-the shelf visualization products and control systems designed to deliver optimal performance, reliability, and energy efficiency across a variety of indoor, outdoor, public, and commercial applications.

Display Solution

PROJECTORS

Large Venue & Mapping

With customers and their diverse application requirements in mind, Vivitek strives to address these unique needs with a broad range of display technologies and projectors.

Vivitek projectors captivate audience in venues where the show can't stop and reliability is key. With Vivitek projectors many different stunning environments can be designed. Unprecedented image clarity and brightness, built for intensive use, and a low cost of ownership provide venues with a highly reliable and interactive experience.

Vivitek DU9800Z

Iceland's Lava Centre Uses Vivitek's Powerful Projection Forces

Lava Centre offers an interactive, high-tech educational exhibition depicting volcanic activity and earthquakes. Today with 15 Vivitek's laser projectors and a wide range of lenses the Lava Center demonstrate the volcanic elements and ensures an unforgettable and realistic guest experience.

PROJECTORS

Robust Anti-Dust Sealed Optical Engine Design

The projector's reliability is ensured thanks to its air tight sealed optical engine which eliminates negative dust impact and increases light efficiency. The benefit to end users of it being air-tight, is that tiny dust particles cannot get into the optical engine part, and thus not able to interfere with the DMD chip, which makes the projector much more robust. A further advantage is the improved light efficiency, as the light path to the DMD is not affected by dust particles, which ensures a higher brightness level.

Laser

Vivitek's laser series includes high performance projectors that can be relied on to create an unforgettable and realistic experience, while providing reliability, durability and ease of use. Laser projectors are capable of maintaining brightness and colour consistency over long periods of use, making them an excellent long term proposition. Flexible to use, with high brightness and low total cost of ownership, laser projectors have quickly become the optimal projection choice for a diverse range of applications.

Constant Brightness Feature

The projectors are equipped with smart sensors, constantly measuring the light output and adjusting the illumination accordingly to maintain consistent brightness at a predefined level. This helps to reduce the recalibration cycle of an edge blending project.

PROJECTORS

Roman Barcelona Comes to Life Using Vivitek Projectors

Vivitek's high brightness and versatile projectors combined with great flair and imagination were the key to Ignis Fatuus during the annual light festival in Barcelona. For a demanding light outdoor installation designed to remember the Roman history of the city, eight edge-blending projectors were used. The projected image created dramatic effects to evoke the historical Roman themes.

INSTALLATION PROJECTORS

Conference and Meeting Rooms

With a diverse projector line up, Vivitek serves conference rooms to large venues. Reliable and feature-rich projectors amplify presentations with impactful and clearly defined visuals.

9800 – Meeting room Vivitek offers powerful, feature-rich projectors so every audience member can appreciate your presentation.

INSTALLATION PROJECTORS

How to Choose the Right Projector for the Meeting Room

Choosing a new projector can be a complicated process. To narrow down what may seem like an impossibly long list of options, here are five things to consider when choosing a meeting room projector.

Size Projectors are available in a wide variety of sizes, ranging from large, high-end units to small portable units. If you plan on installing the unit in a conference room, consider a larger ceiling-mounted unit. The interior design and ceiling height of the meeting room are also factors to think about. A compact size projector has a small footprint, meaning it is ideally suited for use in meetings and lessons because it is not burdened by any unnecessary bulk, which can be a factor in full and busy rooms where space is at a premium.

Resolution Projectors are available in a wide variety of resolutions, from XGA to WXGA, to 1080p, WUXGA, and 4K-UHD. It's best to start by thinking about how the projector will be used. Larger screens and video content are better suited to 1080p projectors, while 4K-UHD projectors are the new trend for very large screens or graphically-intense multimedia content.

Brightness The brightness you need depends entirely on where you intend to use the projector. For typical use in a mid-sized meeting room, consider looking at least 4,000 to 6,000 lumens, or even higher for spaces receiving more natural light.

Connectivity Last but not least, don't forget to consider what kind of computer, mobile device, or media source you'll be using and how to connect it to the projector. If you anticipate the need to connect your projector to a range of different devices, think about adding wireless connectivity, such as Vivitek's NovoConnect to, connect multiple devices wirelessly.

PROJECTORS & WIRELESS PRESENTATION

Wireless Presentation & Collaboration Turns Classrooms Into Collaboration environments

Whether it's a teacher delivering a lesson, explaining the study goals for the week, or students sharing homework results with their fellow classmates, connecting and sharing content is quick and simple.

Nowadays social media, videos and other online resources are a vital part of the educational experience. Vivitek's NovoConnect Collaboration Solution allows students to contribute during the lecture, while keeping educators and administrators in full control of content.

NovoCast brings wireless presentation to the classroom in order to improve participation, collaboration and sharing of ideas for up to eight participants. This device is a perfect solution for all educational needs. It creates a common creative space, improves the

fluid exchange of thought and encourages constructive dialogue. We try to provide an opportunity for the educators to make their classes as engaging as possible and to involve the greatest amount of students.

Connect

Connect to share content and mirror any device directly onto the big screen in meetings and lectures.

Teach

Work with up to 64 participants sharing screens from up to four devices with cross-platform screen mirroring

Share

Share ideas and files instantly with all participants, so no one is out of the loop.

NovoCast

NOVO CONNECT SOLUTION

NovoConnect Collaboration Solution

Presentation & Collaboration Solution for Conference & Meeting Rooms

Optimized to meet the technical and logistical challenges of corporate environments, Vivitek display and collaboration solutions aim at coordinating teams and ensuring effective collaboration. From small brainstorming sessions to big board meetings, NovoConnect in combination with Vivitek's projectors offers an effective way to collaborate.

Direct connection with Launcher

Using Launcher guests or team members can instantly connect to the NovoConnect unit from their laptops without installing any software. A choice of all three models: **LauncherOne**, **LauncherPlus** and **LauncherPlus USB-C** can be used to accommodate different user needs in the meeting room, for guests or for internal staff.

LauncherOne is specifically designed for companies with strict Data Loss Prevention (DLP) and IT security policies that lock USB ports for storage devices. The LauncherOne enables meeting connectivity and collaboration while maintaining full data integrity and network security.

CONNECT

With NovoConnect Collaboration solutions anyone in a meeting room can connect their tablets, phones or laptops present content to the main screen and collaborate.

SHARE THE CONTENT

When it comes to collaboration sessions, more participants means more valuable opinions and more great ideas.

To support as many simultaneous users as possible, NovoConnect can accommodate up to 64 connected participants and can display up to four screen mirrors across a single display. This allows for easy comparing across screen sources and for everyone in the room to get involved in discussions.

ANNOTATION AND POLLING

The presenter of the content can choose to use the annotation option or the polling and voting feature.

TOUCH SUPPORT

NovoConnect comes with function that allows presenters to control any application on a laptop without using the computer mouse.

NovoProjector

The newest addition to Vivitek's collaboration range is the NovoProjector. A new generation of smart projector designed for corporate meeting rooms that matches high performance with a compact and small footprint, and also up to 20,000 hours of operation thanks to its laser light source. The wireless collaboration NovoConnect Solution is embedded within the projector and offers flexibility and ease of use.

NOVO CONNECT

NovoTouch Flat Panels

NovoTouch Collaborative and Interactive Flat Panels

NovoTouch is a powerful collaboration solution that is ideal for conference rooms, meeting areas and corporate lobbies. NovoTouch Flat Panel is an all-in-one premium choice featuring an interactive screen available in various sizes.

- 4K-UHD (3,840 x 2,160) resolution for outstanding details and stunning visuals
- Complete range of sizes from 65", 75", 86", to 98" with LED backlit technology for brighter picture, longer life and lower energy cost
- An anti-glare surface improves the screen visibility in high ambient light environments and a thick toughened glass provides added protection against screen damage

Equipped with Vivitek's NovoConnect Solution, NovoTouch panels offer an advanced approach to group work in an all-in-one display. Featuring digital annotation and wireless capabilities, NovoTouch seamlessly connects users to one display, using technology that allows ideas to flow naturally.

- Connect up to 64 users and display up to four screens, simultaneously, on a large format display
- Built-in whiteboard and touch panel capabilities
- On-screen annotation, mark-up and wireless distribution
- Native screen mirroring via AirPlay and Google Cast
- Dual network support for separate or parallel wired and wireless connections for ultra secure networks
- Optional Accessory: LauncherPlus, a USB device that provides tactile operation without installing the software
- Reduces clutter and promotes a cable-free workplace with Wi-Fi connection and wireless file sharing

NovoTouch also comes with the NovoDS Solution built-in, which can be used as a digital signage display when a meeting is not in session. Additionally, Vivitek's NovoDS Cloud's new on-premise capabilities enables compatibility with a company's own cloud service.
